

Android App mock-up

Start screen

This would be the first screen for when the app starts up.  is the Upload icon and will flash when an upload is able to be sent, meeting upload options applied.  is the settings icon that will take user to the setting options. Colours for screen may depend on if the company have set colours, i.e. Facebook uses white and blue.

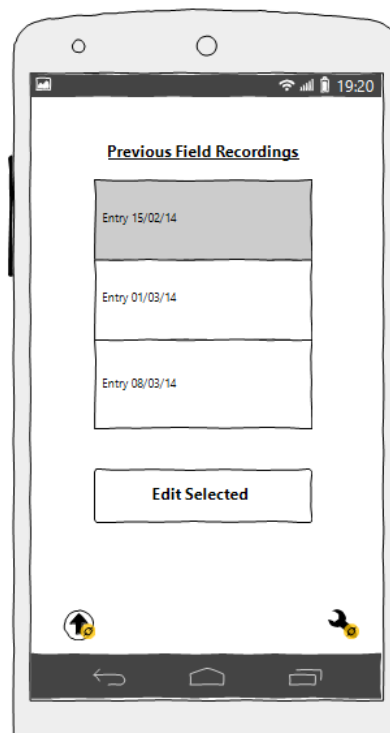

New Field Recording screen

The 'New Field Recording' screen is displayed on a smartphone. At the top, the status bar shows the time as 19:20. The title 'Plant Recording dd/mm/yy' is centered. Below the title is a 'Plant list' dropdown menu. A large rectangular area with a diagonal 'X' is labeled 'Click to take plant picture'. Below this is a 'Location list' dropdown menu. Another large rectangular area with a diagonal 'X' is labeled 'Click to take area found picture'. A yellow highlighted box contains the text 'Note on where plant is found'. Below this box are 'Submit' and 'Clear' buttons. At the bottom, there are two circular icons: one with an upward arrow and a 'C' inside, and another with a wrench and a 'C' inside. The Android navigation bar is visible at the very bottom.

Plant list is a combo box with one option to manual enter a plant name. Note section will open up with a keyboard below, then only showing top line when using other features.

Previous Field Recordings screen

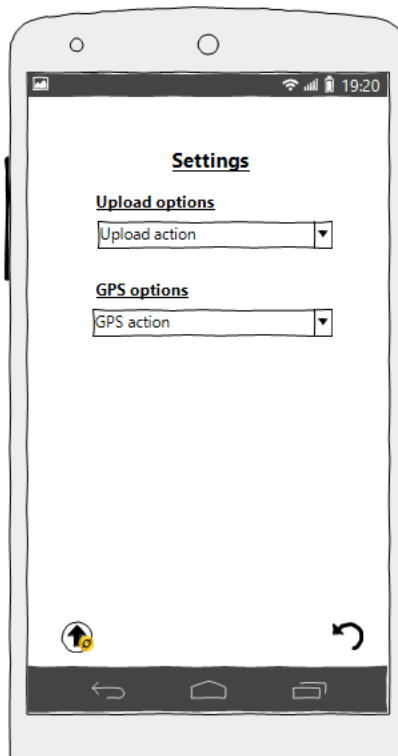

The 'Previous Field Recordings' screen is displayed on a smartphone. The title 'Previous Field Recordings' is centered. Below the title is a list of three entries, each in a rectangular box: 'Entry 15/02/14', 'Entry 01/03/14', and 'Entry 08/03/14'. The first entry is highlighted in grey. Below the list is an 'Edit Selected' button. At the bottom, there are two circular icons: one with an upward arrow and a 'C' inside, and another with a wrench and a 'C' inside. The Android navigation bar is visible at the very bottom.

Previous Plant Record screen

The plant list combo box will allow the user to select which plant entry they can view and/or edit from selected visit.

Settings screen

Admittedly I am not too sure what settings may be required, I think upload options like only uploading using WiFi and possible options to only active GPS while app is in us. Also, 🗑️ is replaced with ↶ which will return the user to the screen they came from.

Upload screen
